Other Decisions About Your Checks & Forms Order

How many checks?

What will the starting number be?

Do you want your personalization in an upgraded style?

Do you need your laser checks reverse numbered?

Do you want to print a logo on your checks?

Do you want one or two signature lines?

All the Peachtree business checks in this catalog already comply with Check 21 legislation.

Sage Abra Blank Laser Check Stock and MICR Toner

Blank Laser Check Stock

If you have software that allows you to print the entire check face, including the MICR code line, we offer our same high-quality laser stock without imprint.

Sage Abra offers a blank check that allows for the bottom stub to remain without having to create additional folds in the check. Check item numbers NL-VTSC are 8 1/2" x 10 1/2", have the check at the top, and can be folded on the perforated lines to fit inside their compatible envelope, item DW-6 or DW-6S.

The original blank stock (8 1/2" x 11") is still available and is offered in several colors with check at top, middle, or bottom of sheet. If the bottom stub is removed from this check or the check is folded by an automated machine then it fits in envelope DW-6 or DW-6S.

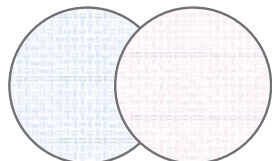

You also have the option to purchase the 8 1/2" x 14" size, which allows the printing of two checks with stubs at one time and corresponds with the Blank Laser Short Form in Sage Abra Suite. When the checks are separated, the compatible envelope is DW-2 or DW-2S.

TakeCharge! and Nolo Business Tools

Education—Brush Up on Business Basics

Crash Course—TakeCharge! Accounting Tutorial

This self-paced program is designed for the nonaccountant who needs to understand the basics of accounting terms and procedures. In this guided tour, you'll receive an introduction to financial statements and learn about the accounting equation of debits and credits. You'll be given detailed instruction about the chart of accounts and period-end processing. Finally, you will acquire invaluable tips on how to review your financial statements so that you can catch common errors before they reach the next level.

The TakeCharge! tutorial gives practical examples taken from real-world experiences. Interactive activities throughout the program help to confirm your understanding. Reference materials and documents are also included in the program so you can create, customize, and print your own accounting manual.

Also in the tutorial you will find other helpful sections, including:

- Examples and descriptions of accounts
- Common questions and answers
- A comprehensive glossary

Reverse Numbering

If your laser printer loads from the front instead of the top, you may need us to reverse number your single sheet checks. Here's an easy test: Mark a sheet of paper on one side, load the sheet into your printer with the marked side up, and print. If what you printed is on the reverse of the marked side, you'll want to write "yes" in the "Reverse Number" box on your order form.

Remember!

When you change banks or your bank is assimilated in a merger, your account information will change. Be sure to provide us with your new account number and enclose a sample voided check with changes indicated on the face of the check.
