Reverse Numbering

If your laser printer loads from the front instead of the top, you may need us to reverse-number your single-sheet checks. Here's an easy test: mark a sheet of paper on one side, load the sheet into your printer with the marked side up, and print. If what you printed is on the reverse of the marked side, you'll want to write "yes" in the "Reverse Number" box on your order form.

Remember!

When you change banks or your bank is assimilated in a merger, your account information will change. Be sure to provide us with your new account number and enclose a sample voided check with changes indicated on the check face.
